

This helps in straining. Connect the wastewater into this pot by using a pipe. Cover entire area with coir. The coir works like a filter. Clean or change the coir every month.

You can learn and teach people by demonstrating a soak pit construction. You may also get more information from Panchayat. Explain people about nuisance of waste water. Motivate people to develop kitchen garden in their houses. Discuss this issue in the village planning meeting. People can help each other in constructing soak pits.

What do you think of this?

- Think of a village without pools of stagnated dirty water? Who will help you in making this happen?
- How will you raise awareness on hazards of indiscriminate waste water disposal?
